## Details

Every session is curated to include a diverse array of experiences and insights, featuring perspectives from prominent figures in leadership, industry, and organizational expertise. Throughout the program, the cohort will explore the 403 square miles comprising cities, villages, and townships within Crawford County. This journey will create the opportunity to better understand the individuals and institutions that collectively contribute to making Crawford County a place where people seek to work, live, and raise their families.

For the majority of our sessions, participants will be required to arrange their own transportation. Breakfast and lunch will be provided for all attendees during each session.
